

Quality Components *Technical Expertise* *Superior Service* | **PART OF THE PROCESS**

BEARING MAN GROUP

Through the consistent expansion of our operations since 1974 we have become Africa's largest specialist distributor of engineering components. Now, as a combined force with well over 100 outlets in Southern Africa, BMG is strategically positioned to service all sectors of industry including agriculture, mining, petro-chemical, sugar, paper and general engineering, as well as the automotive industry.

Our vision is to be an integral part of the productivity and operations of each customer's business. By providing technical solutions that optimise productivity, BMG will make a difference to the efficiencies of every plant.

BMG has secured exclusive supply, service and distribution agreements with some of the world's most respected manufacturers of leading engineering components. Immediate availability of a comprehensive range of quality branded products sets the company apart in a highly competitive industry.

Vision

Our vision is to be a powerful force in the engineering industry, providing superior technical solutions to our customers. This will be achieved through our leading brands of quality products and the best technical skills available. We strive to be a focused organisation of people and branches trained and dedicated to offering our customers brilliant service.

Mission

SUPERIOR SERVICE

- To offer one source of supply to the replacement, resale and OEM markets, through a network of strategically situated branches.
- To ensure correct selection and operation of products, in the interests of striving for total customer satisfaction; to provide technical resources, design and advice services.
- To deliver the correct component at the right time, from a large and comprehensive inventory of quality branded products to customers operating across the broad spectrum of industry.
- To provide a 24-hour service throughout the year to satisfy the requirements of continuous process and multi-shift operations.

PROCUREMENT

- To source high quality products from manufacturers dedicated to excellence in design and production, with research and development facilities capable of meeting the demands of advanced technology.

PERSONNEL

- To employ highly experienced and knowledgeable staff capable of serving the needs of our customers and their industry requirements.
- To equip our staff with the necessary skills required to meet the future growth, market and service demands of BMG.
- To treat BMG's most important asset, its employees, with the respect deserving of professionals in their field, acknowledging their capabilities and recognising their achievements.
- To involve all employees in the achievement of the mission statement by creating a unified team concept.

SANS ISO 9001:2008

The BMG circle is formed by the precise interlocking of three identical arcs, each representing a fundamental aspect of the BMG offering:

QUALITY COMPONENTS

As a single, unified entity, we make it easier and simpler for our customers to source the widest range of high quality brands. From the smallest fastener to the largest geared motor, customers know that they can rely on any and every component in the diverse BMG catalogue. Just as the whole is only strengthened by the sum of its parts, so too is BMG.

TECHNICAL EXPERTISE

Our Academy of Excellence instils a culture of learning and knowledge sharing in the company. Skills training, which encompasses a strong focus on technical skills, selling and service skills, empowers staff to drive and deliver on our business objectives.

The Technical Resources division is staffed by a team of top engineers and technicians with experience and skills

spanning the BMG product range. By combining their expertise, the team produces consolidated solutions and improvements to customer's entire production processes. Integral to this BMG consultancy are on-site field services and condition based maintenance programmes designed to ensure sustainability of the solution and to maintain equipment at peak production efficiency. Our World Class Production Efficiency programme draws on these key offerings to provide customers with quantified competitive advantage and essential profit maximisation for their businesses.

SUPERIOR SERVICE

At BMG we believe that our customers also play an integral part in maintaining the inner-workings of OUR machine.

That's why we're committed to ensuring that we truly understand our clients' specific needs and deliver on them with the highest quality products in the shortest possible time. Proud contributors to your success... **PART OF THE PROCESS**

BEARING MAN GROUP

ECONOMIC EMPOWERMENT

Since 2007, Black Empowerment partners acquired a stake in Humulani Investments thereby ensuring BMG meets its BEE equity requirements.

20% of new ordinary shares in Humulani have been issued to aloeCap and 5% of new ordinary shares to the Staff Trust. This trust has been established in terms of the mandate given by BMG's shareholders for the benefit of black staff at BMG, as set out in the government's Broad Based BEE Codes of Good Practice.

BMG management is committed to the development and implementation of an integrated BEE strategy that aligns with company goals across all levels of business. This includes employment equity, skills development, socio-economic development and enterprise development.

ISO ACCREDITATION

BMG is ISO 9001:2008 accredited, ensuring that all our activities conform to the highest assurance systems.

As quality is of paramount importance, the management and employees of BMG are committed to complying with the requirements of the ISO 9001:2008 quality standard and shall strive to continually improve the effectiveness of the quality management system.

BMG strives to exceed our valued customers expectations, by delivering on the three fundamental aspects of our brand: Quality Components, Technical Expertise and Superior Service.
